

28-24-1 Definitions

- ▶ Requires all persons providing cosmetology services to comply with the infection control regulations to hold all practitioners to the sanitation standards regardless of license status.
- ▶ Requires bleach solution to be a chlorine bleach mixed according to manufacturer's instructions in lieu of the standard 9:1 ratio to accommodate different concentration levels of bleach.
- ▶ Added definitions for "disinfect" and "disinfectant" to provide consistency in disinfecting procedures addressed in later regulations as well as allowing different disinfectant types (sprays, wipes, foams)
- ▶ Defined "sterilization" to provide clarification regarding electrology instruments and clarifying UV light is not an approved sterilization method.

28-24-2 Personal Cleanliness

- ▶ Cleaning hands with an alcohol-based hand sanitizer or soap and water must be done before and after each service.

28-24-3 Communicable diseases or conditions

- ▶ Clarified language regarding services provided to or by a person with a communicable disease or condition.
- ▶ Clarified the blood exposure procedure.

28-24-4 Linens and capes

- ▶ Specified a cleaning/disinfecting procedure for capes
- ▶ Removed reference to water temperature and duration of washing for cleaning linens.

28-24-5 Surfaces and treatment tables

- ▶ Surfaces that came in contact with a consumer must be disinfected daily.

28-24-6 Products and containers

- ▶ Products must be kept in labeled, clean containers and closed when not in use.
- ▶ Clarified product dispensing procedures to prevent contamination of the product.

28-24-7 Waxing

- ▶ All wax and sugar paste must be maintained at a temperature specified by the manufacturer's instructions.
- ▶ Allows for the use of single-use roll-on wax cartridges.

28-24-8 Single-use items

- ▶ Single-use items must be stored in a clean, labeled container or original manufacturer's package and must be thrown away immediately after use.
- ▶ Removed the requirement of a neck strip/clean towel because all capes need to be cleaned/disinfected after each service.

28-24-9 Pedicure equipment

- ▶ Simplified the cleaning and disinfecting procedure and requires the equipment to be consistently disinfected after each service, regardless of the time of day.
- ▶ Addresses the use of single-use pedicure liners.
- ▶ Removed the weekly bleach procedure.
- ▶ Requires pedicure equipment to remain in a clean and disinfected condition, regardless of whether the equipment is in service.

28-24-10 Cleaning and disinfecting nonelectrical instruments and equipment

- ▶ Allows for other types of disinfectant to be used for disinfecting certain instruments.
- ▶ Removed the requirement of a tuberculocidal disinfectant
- ▶ Requires the SDS and sufficient disinfectant or bleach solution to be available at all times ensure safe services.

28-24-11 Disinfecting electrical instruments

- ▶ Removed the requirement of a tuberculocidal disinfectant.
- ▶ Towels must be removed from a towel warmer daily and towel warmers must be disinfected daily.

28-24-12 Electrolysis instruments, equipment, and practices

- ▶ Simplified the language for all electrolysis instruments and requires them to be either single-use items or sterilized.
- ▶ Allows for glass test tubes be used in addition to sterilization bags.

28-24-13 Physical facilities

- ▶ All areas of establishments must be kept clean and in good repair.
- ▶ Restroom sinks must not be used for services or cleaning instruments or equipment.
- ▶ Added language to allow for sinks within nail technology, esthetics, and electrology establishments.

28-24-14 Prohibitions

- ▶ Removed the prohibition for alcoholic beverages and eating in the service area of an establishment.
- ▶ Specifically prohibited the use of MMA (monomeric methyl methacrylate) products.
