Re: Esthetics Practical Exam

March 16, 2021

Dear School Administrators:

The exam company has informed the Board of a new trend concerning esthetics practical exam candidates that may be causing failure of the practical examination. Candidates are regularly attempting to reuse and disinfect disposable gloves.

Please remind your students that disposable gloves are single use items and cannot be disinfected or reused. Contaminated gloves must be disposed of in a covered waste receptacle and hands must be washed/sanitized after removal and prior to donning new gloves.
